

Summary  
9 QTS-6OCHA  
19 July 80

First impressions were of an area that was a water/structure/land interface that had to do with shipping. There were many sweatings, hot people, some in hardhats, working here, along with much machinery, functional structures, and a great jumble and complexity of objects.

Impressions were of a port area, and moving and unloading things. An analytic/signal impression of containers was present.

A search was then conducted on 5 ships;

Impressions were that four ships were either clean or could not be detected against. A fifth vessel, later identified by the monitor as the

SG1A

SG1A

SG1A [REDACTED] seemed to have indications of contraband aboard - at 2 location immediately at the stern and approximately water line level. (See ~~at~~ diagram) Material was in the form of ~~blocks~~ hard brick-shaped blocks, may have been wrapped in plastic, but was rolled up in loose fabric and stuffed neatly into a space between two vertical metal surfaces or walls.

0198/7090 - coordinates

9 QTS-6 vessels

S: 01

M: 00C

V: 00A

Background: The current locations of vessels, #1 thru 5 inclusively are known.

EET:

1. Determine the presence, if any, of contraband aboard ship - for each vessel

2. Determine & describe the location of the contraband aboard ship.

3. Describe how the contraband is wrapped / packaged.

4. Describe the type of cargo, ~~if any~~, located nearest the contraband.
